

Questions Received for FY 2024 Solar for All Community Renewable Energy Facilities (CREF) RFP

Q1 - Where can I find the list of subcontractors that were awarded the subcontract in previous years, 2019 – 2023? I haven't been able to locate this information anywhere on the website. Please advise.

A1- You can find some of this information in the press releases on our website, such as here in 2019: <https://www.dcseu.com/news-blog/press/dcseu-selects-contractors-to-bring-over-7-megawatts-of-solar-to-dc-through-solar-for-all-program>

here in 2022: <https://www.dcseu.com/news-blog/press/dc-sustainable-energy-utility-launches-11-5-million-in-2022-solar-for-all-incentives-for-solar-developers-contractors>

and indicated in part in blog articles like this one from 2023:

<https://www.dcseu.com/news-blog/news-blog/blog-posts/6-community-solar-sites-in-dc-you-didn-t-know-were-helping-residents-save-money>

Q2 – Is the rebate method for the ITC set or is there an ability to propose an alternate method of rebating the awarded ITC benefits? We are not sure how the ITC % awarded would be split by check and would like the ability to propose another option for splitting the financial benefit along with our submission of the RFP.?

A2 - The DCSEU and DOEE are open to ongoing conversations with contractors and developers about how we approach the ITC Adders. If bidders would like to propose another option for splitting with DCSEU/DOEE the financial benefit along with their submission of the RFP please provide that in your proposal.
